

Updates since last meeting

Ollie John - 18/01/2022

In December, we presented an update on the work of the group at a Council meeting of the Academy of Medical Royal Colleges Wales. The Academy were supportive and encouraging of the work undertaken and keen to collaborate when helpful.

We've received the ToR of Welsh Governments recently established National Clinical Advisory Group and have been invited to provide representation from the group.

We recognise it's been an incredibly busy time for individual members of the group, both in terms of clinical activity as well as requests for information and evidence from the Senedd.

Actions since last meeting

We've written to HEIW with feedback on the presentation received on the Mental Health Workforce Plan. We've received an update, and an offer for a further discussion and presentation as part of the formal consultation process.

Today's meeting (18th January)

Welcome to Dr Jo Mower who is the Clinical Director for the National Program for Urgent & Emergency Care.

The meeting will focus on member updates, as well as an item on Mental Health Inequality.
